The present and the future of clinical research in mCRC: most important, most interesting and most promising ongoing trials

Dirk Arnold

16:00 Adjourn and final evaluation questionnaire

[**Addressed to**]

Physicians specialized in anatomical pathology, oncology, pharmacology, radiology, surgeons involved with epidemiological, diagnostic, histopathological, biomolecular and instrumental management and treatment of patients affected by colorectal cancer, and biologists.

[**Aims**]

The goal is to provide an adjourn on the current scientific evidence concerning new therapeutic strategies with a special attention to biological knowledge of treatments. Lectures of International experts will give large prospects for medical treatments of early and advanced phases.
