

A nighttime photograph of the Colosseum and the Eiffel Tower in Rome, Italy. The Colosseum is on the left, illuminated from within, showing its iconic arches. The Eiffel Tower is on the right, also illuminated, with its lattice structure clearly visible against the dark sky. The overall scene is a blend of ancient Roman architecture and modern French engineering.

COLORECTAL  
LIVER METASTASES

ITALIAN-FRENCH  
SYMPOSIUM

Accademia Lancisiana and  
Terminal Gianicolo Congress Center  
Rome, April 10-11 2013

President:

Giuseppe Maria **ETTORRE**

*Dear Colleagues,*

*Dear Friends,*

*It is my great pleasure to invite you to join the Italian-French Symposium focusing on Colorectal Liver Metastases.*

*Colorectal and Hepatic surgery have an important history in France as a result of exchanges with other countries, in particular with the Italian scientific community.*

*The aim of this symposium is to promote the exchange and the debate between the Italian and French scientific community.*

*My long French experience has been very productive and formative for me and I wish that this symposium could enrich friends, surgeons, oncologists and young surgeons that face this discipline.*

*You are all invited in Rome for this symposium located in the heart of the eternal city.*
