

2nd International Michelangelo Conference and Gianni Bonadonna Prize
Promises and challenges of developing new drugs in oncology
Milan. July 4-5, 2013

Preliminary Program

Day 1, Thursday, July 4th, 2013

Chair L. Gianni (I)

3.00 - 3.15 pm	Welcome	L. Gianni (I)
3.15 - 4.45 pm	MAIN LECTURES: New methods and platforms for mutational analysis	G. Viale (I)
	Facts and promises of "liquid biopsies" of solid tumors in new drug development	A. Bardelli (I)
4.45 – 5.30 pm	Gianni Bonadonna Prize Presentations of the 3 selected projects Report of previous project winner (A. Necchi)	

5.30 – 6.30 pm Members of the Scientific Committee meet to evaluate the 2013 selected projects and declare the winner

Day 2, Friday, July 5th, 2013

New immunotherapeutic interventions in oncology (preclinical and clinical data, vaccines)

Chair G. Parmiani (I)

9.30 – 9.50 am	Immunologic effects of targeted therapies and chemotherapy	L. Zitvogel (F)
9.50 – 10.10 am	PD1-PD1L targeted immunotherapy	J.R. Brahmer (USA)
10.10 – 10.30 am	Antibody therapy targeting CD47	R. Majeti (USA)

Coffee break

Chair C. Sessa (CH)

11.00 – 11.20 am	DNA interacting agents: beyond PARP inhibitors	H. Calvert (UK)
11.20 – 11.40 am	Promises and challenges of RNAi therapeutics	A.K. Sood (USA)
11.40 – 12.00 am	PI3K inhibitors mechanistic-based combinations	A.M. Gonzalez-Angulo (USA)
12.00 – 12.20 am	MET inhibitors mechanistic-based combinations	G.R. Blumenschein (USA)

12.20 am Discussion

Lunch

2.00 – 3.00 pm	Main lecture PI3K-AKT and other signaling pathways	Y. Yarden (IL)
3.00 – 3.30 pm	Gianni Bonadonna Prize The winner's ceremony
